SBOL implications

SBOL Visual

- Icon selection process not standardized
- Need for “generic” icon

SBOL

- Desire stable XML serialization to import SBOL into DeviceEditor

  1) SBOL not currently sufficient to reconstitute DeviceEditor designs
     Embed SBOL Visual icon selection?
     Explicit (combinatorial) DNA component ordering?
     Replicate/linked DNA components?
     DNA template sequence context

  2) DeviceEditor XML serialization documentation online

- Copy/paste SBOL via system clipboard interface

  DeviceEditor clipboard interface documentation online
